Measurement programs and reports can be created with just a few clicks.

*Pictures shown are concept images

**Auto MeasureEyes**

Easy operation for anyone!

Measurement programs and reports can be created with just a few clicks.

*Stitching*

Entire images of large samples can be displayed by a stitching process, which can then be used for measurement. (*stitching: bonding of multiple images)

**One-Click Measurement**

Users can acquire highly precise results by clicking on measurement areas. Detailed settings are no longer required for Auto MeasureEyes.

**Easy Programming / Reporting Functions**

Procedures taken to conduct measurement become the program itself, allowing users to repeat measurement by simply reloading the program. Measurement result can be exported as OK/NG reports.

**Large Stroke / Long Working Distance**

Offers maximum stroke of 650x550x200mm and 73.5mm working distance (when using Laser AF 63mm) to be applicable to various samples.

*Combined with VMA software (AutoMeasure), more complex shaped samples can be measured
